Brigitte Krenn

Brigitte Krenn is head of the Language and Interaction Technologies Group at the Austrian Research Institute for Artificial Intelligence (OFAI). Coming from a background in the Humanities (German language and literature, philosophy, psychology and pedagogics), she moved into Computational Linguistics and Artificial Intelligence because of her deep interest in simulating human-level capacities on mathematical machines. Since the time of her PhD in Computational Linguistics at Saarland University, Saarbrücken, Germany, she has been working in the field of AI in basic and applied research, with focus on natural language processing including data analytics, modelling multimodal human-like communicative interaction, working with text and speech, with artificial agents and robots, applying both principle-based and machine learning based techniques. She has longstanding experience in leading and participating in national and inter-national multidisciplinary research and development projects, in transferring insights and results from basic research to industry, and in fostering knowledge transfer between disciplines.
