#ETIA

Educating global leaders since 1754

POSTGRADUATE STUDIES

MSc in ENVIRONMENTAL TECHNOLOGY & INTERNATIONAL AFFAIRS

Master of Science (MSc) awarded by and organised jointly with TU Wien

ACADEMY FOR CONTINUING EDUCATION

Interdisciplinary programme in English combining international studies and environmental technology for a sustainable future.

- Two years, full-time
- International law and economics
- Political and historical contexts
- Technology and natural sciences
- Environmental technologies: air, water, waste and various forms of energy

'Tackling the destruction of our environment and, in particular, climate change are amongst mankind's most complex challenges. Developing solutions requires technical, political and legal knowledge in equal measure. Few people can claim that type of multi- and interdisciplinary expertise. ETIA alumni can.'

Holger Hestermeyer
Professor of International Law and European Union Law and Academic Director ETIA, Vienna School of International Studies

FROM ETIA TO THE AUSTRIAN ENERGY SECTOR VIA BRUSSELS

'The DA certainly played an important role in the beginning of my career; the skills, the activities and the classes at the DA and at TU Wien enabled me to pursue a career in public affairs and energy law. Building connections with students from all over the world has enriched my professional as well as my personal life.'

Julia Kostal
ETIA 2017-2019
